PC Technician (A+)

(in preparation of the international **CompTIA** exam)

Duration: Saturday classes for a period of 12 weeks

About this programme

This Short Learning Programme (SLP) is designed for students who would like to become involved on the technical side of computers. This programme exposes students to a practical environment and on successful completion, students will have the opportunity to gain employment as entry level technicians.

Programme outline

The following topics will be covered in the programme:

- Safety & Professionalism
- CPUs
- RAM
- Firmware
- Motherboards
- Power Supplies
- Mass Storage Technologies
- Implementing Mass Storage
- Essential Peripherals
- Building a PC
- Maintaining & Optimising Operating Systems
- Working with the command-line interface
- Troubleshooting Operating Systems
- Display Technologies
- Essentials of Networking
- Local area networking
- Wireless Networking
- The Internet
- Virtualization
- Portable computing
- Printers and Multifunction devices
- Securing computers

Admission requirements

You are required to have knowledge, comprehension and application of the English and Maths at NQF Level 2 / Grade 10 or equivalent. Basic computer knowledge and mouse-skills are essential.

How will I be certified on completion of this programme?

On successful completion of the programme, you will be awarded a **Unigrad Short Learning Programme Certificate in PC Technologies (A+)**.

You have the option to write the international CompTIA exams and receive additional CompTIA A+ certificates on successful completion of the CompTIA exam (additional CompTIA fees apply).

Programme duration and structure

12 Saturday morning classes of face-to-face tuition presented by qualified and experienced professionals. During the course of your studies, you will be required to complete formative and summative assessments. Formative assessments may include but are not limited to projects, tests, discussions and presentations. A summative assessment is the final assessment (exam), conducted at the end of the programme.

Programme fee

Contact Unigrad and speak to any student career consultant for course fee information.

Are there any additional costs?

Prescribed course material, lectures and Unigrad College assessment fees are **included**.

You have the option to write the international CompTIA exam which is an optional extra.

What is a Short Learning Programme?

The modern business world demands a vast variety of skills and abilities. Unigrad offers an extensive range of short learning programmes particularly designed to address these demands by enhancing the quality of skills and knowledge available to the workplace. These short learning programmes are typically aimed at working adults, or those seeking employment and whilst they are not full qualifications, such as those appearing on the NQF and registered with SAQA, their benefit lies in their rapid and significant improvement to skill and knowledge levels of the student. This makes short learning programmes ideal for people who need to upgrade their CV's, but do not have the time or finances to engage in a lengthy course of study.
